PROJECT: The Autonomous Compliance Intelligence System (ACIS)

A. Project Charter (Updated)

Objective: To evolve the "Regulatory Pulse Dashboard" into an autonomous system that not only monitors laws (HIPAA, RxDC, CMS) but also triggers automated remediation workflows using the Cloudflare Agents SDK.

Strategic Alignment:

- **RxDC/Gag Clause:** Automated coordination of attestations using R2 and D1.
- **Incident Response:** Real-time generation of NIST-aligned playbooks.
- **Autonomous Monitoring:** The system "wakes up" (Cron), analyzes drift (Claude), and patches its own reporting logic.

B. Integrated Roadmap (The "Power Setup" Edition)

Phase 1: Agentic Foundation (Weeks 1-2)

- [ ] **Scaffold:** Initialize the project using `cloudflare/agents-starter`.
- [ ] **State:** Bind the Worker to **D1** for long-term logging and **Durable Objects** for agent "memory."
- [ ] **Intelligence:** Configure the **AI Gateway** to route Claude 3.5 Sonnet calls.

Phase 2: Regulatory Ingestion & Action (Weeks 2-3)

- [ ] **The "Scraper" Agent:** Deploy a sub-agent that monitors CMS.gov and HHS RSS feeds.
- [ ] **Risk Scoring:** Use Claude to categorize updates into "Immediate Action Required" vs "Informational."
- [ ] **GitHub Trigger:** Enable the agent to open a PR if a policy document in the repo needs an update based on a new law.

Phase 3: The Executive Vault (Weeks 3-4)

- [ ] **Attestation Portal:** Build the Cloudflare Pages UI for the Gag Clause/RxDC Vault.
- [ ] **Secure Storage:** Implement R2 bucket integration for encrypted document storage.
- [ ] **Automation:** The Agent sends automated reminders to vendors with missing SOC 2 or HIPAA docs.

C. Status Tracking (The Brain)

Module	Component	Status	Notes
Infra	Cloudflare Agents SDK	[Pending]	Primary runtime for the "Autonomous Officer"
Infra	D1 Database	[Uninitiated]	Schema: `compliance_events`, `vendor_risk`, `attestations`
Intelligence	Claude 3.5 Sonnet	[Implemented]	Using your direct API Key via Claude Code
Backend	CMS Scraper	[Uninitiated]	Focus: Gag Clause & RxDC updates
Frontend	Executive Hub	[Uninitiated]	Unified Cloudflare Pages Dashboard
